

My Dream Computer System Specifications

1. CPU (Central Processing Unit)

The CPU is the brain of the computer. For my dream system, I would use an **Intel Core i9** processor with high speed for gaming and programming.

- Example: 5.6 GHz, 16 cores.

-

2. RAM (Memory)

I would choose **32 GB DDR5 RAM** to handle multitasking and running heavy applications smoothly.

- Example: DDR5, 5600 MHz.

-

3. GPU (Graphics Processing Unit)

For gaming and design, I want an **NVIDIA GeForce RTX 4090**. It supports ray tracing and AI features for the best performance.

- Example: 24 GB VRAM.

-

4. Storage (Hard Drive / SSD)

I would use a **2TB NVMe SSD** for very fast boot times and large storage capacity.

- Example: Read speed up to 7000 MB/s.

-

5. Peripherals (Optional Section)

- Mechanical Keyboard
- Gaming Mouse
- 4K Monitor
